

### REMOTE PUSHBUTTON

#### **OPERATION**

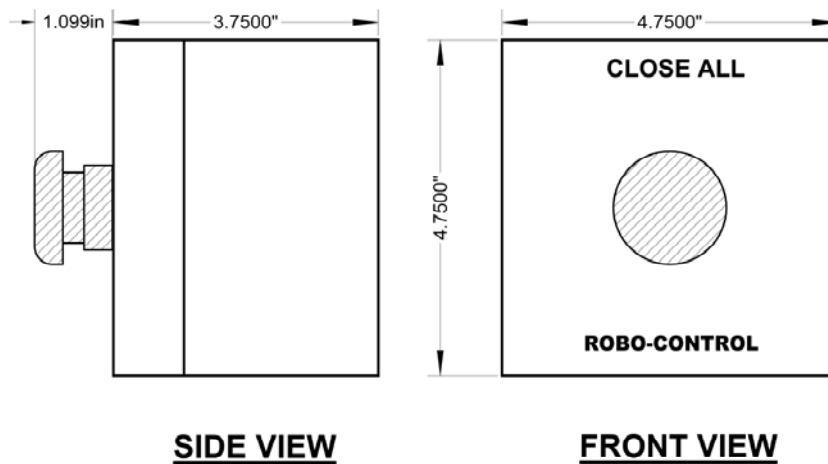

The Model RPB001 is a red mushroom pushbutton mounted in a polycarbonate enclosure. The package is designed to offer operations the ability to close all actuators at one time from a remote location. The enclosure with switch is compatible with chlorine and sulfur dioxide containment areas. The spring-return normally-open switch is rated at 10 Amps at 230 VAC.

#### **ADDITIONAL INFO**

This device is designed to operate with actuator Model U, Model 2000C, and Model RC.
